

 wellcome connecting science		Multiplex assays of variant effects (MAVEs): Approaches, Analysis, and Interpretation					 wellcome sanger institute	
		23-28 November 2025, Wellcome Genome Campus, Hinxton, United Kingdom						
PRECOURSE ON LMS - Linux and R		Sunday 23 November	Monday 24 November	Tuesday 25 November	Wednesday 26 November	Thursday 27 November	Friday 28 November	
	Time	Opening day	1. Problem statement 2. MAVE methods	Computational analysis	Computational analysis	1. Computational analysis 2. Evaluation and interpretation	1. Evaluation and interpretation 2. Project presentations	Time
	08:45	At Hinxton Hall	Why MAVEs? Elizabeth Radford, Alan Rubin TCS	MAVE data analysis I - From raw data to read counts Victoria Offord TCS	QC: MPRA data analysis for other methods Irene Gallego Romero TCS	Variant effect predictors I - Tools and formats Joseph Marsh TCS	Variant classification using MAVE data Helen Firth, Julia Foreman, Miranda Durkie TCS	08:45
	09:00							09:00
	09:15							09:15
	09:30		09:30					
	09:45		09:45					
	10:00		10:00					
	10:15		10:15					
	10:30		10:30					
	10:45		10:45					
	11:00		Break	Break	Break	Break	Break	Break
	11:15	11:15						
	11:30	11:30						
	11:45	SGE experimental design and application Sebastian Gerety, Sofia Obolenski, Rebeca Olivera-León TCS	MAVE data analysis II - From read counts to scores Alan Rubin TCS	Data integration I - Annotating MAVE results Sarah Hunt, Likhitha Surapaneni, Jorge Batista da Roche TCS	Variant effect predictors II - Training and benchmarking Joseph Marsh TCS	Project presentation session TCS	11:45	
	12:00						12:00	
	12:15						12:15	
	12:30	Registration	Lunch	Lunch	Lunch	Lunch	Lunch	12:30
	12:45							12:45
	13:00							13:00
	13:15	Lunch	Lunch	Lunch	Lunch	Lunch	Lunch	13:15
	13:30							13:30
	13:45							13:45
	14:00	Welcome and introductions Wellcome Connecting Science, training team, participants	Base editing and endogenous MAVEs Matthew Coelho C302	MAVE data analysis III - Data analysis using established software Alan Rubin TCS	Data integration II - MaveDB Alan Rubin, Daniel Jaramillo Calle TCS	Clinical validation/calibration of MAVEs Sophie Allen, Charlie Rowlands, Miranda Durkie, Irene Gallego Romero TCS	Project presentation session TCS	14:00
	14:15							14:15
	14:30		Quiz time David Adams					14:30
	14:45		Safety induction C302					14:45
	15:00	Break	The Sanger MAVE pipeline Adam Hunter E360	Break	Break	Break	Wrap-up and close	15:00
	15:15							15:15
	15:30							15:30
	15:45	Course introduction David Adams, Daniel Jarmillo Calle	Break	Break	Break	Break		15:45
	16:00							16:00
16:15	16:15							
16:30	Keynote seminar Clare Turnbull	Seminar Andrew Waters TCS	Seminar Irene Gallego Romero TCS	Data integration III - Protein structure and function Joseph Marsh, Daniel Jaramillo Calle	Optional prep time		16:30	
16:45							16:45	
17:00							17:00	
17:15		17:15						
17:30	Optional prep time	Optional prep time	Optional prep time	Optional prep time			17:30	
17:45							17:45	
18:00							18:00	
18:15	Networking drinks and dinner						18:15	
18:30							18:30	
18:45							18:45	
19:00	Dinner	Dinner	Dinner	Dinner	Dinner		19:00	
		Sunday 23 November	Monday 24 November	Tuesday 25 November	Wednesday 26 November	Thursday 27 November	Friday 28 November
